dashed border means it is invisible (i.e. no border)

This is a set of 2 radio buttons! So, when one is depressed, the other one is visible. In production, the lower button will be updated with the same 2 letter state abbreviation that is shown in the dropdown on the right. If the dropdown is "US' (as would occur with President-related posses), then it will also say US.   The state of being depressed will be represented graphically; e.g., by putting a border around the depressed button.
